Technical Data Sheet - Tecsiflex WP270 Construction Applications

Description

Hydroseal WP 270 RJ-WP27 is a transparent liquid composed of oligomeric siloxane. RJ-WP27 is primarily intended for the water-repellent treatment of fiber-reinforced cement products.

Uses

- Fiber cement products
- Concrete
- Fiber-reinforced cement

Specifications

Appearance	Clear yellow liquid
Active content (%)	100%
Density 20°C (g/cm^3)	1.44±0.05

Characteristics

Super waterproofing effect that greatly reduces the water absorption rate. Hydroseal WP270 is characterized by its long-lasting waterproofing durability and high resistance to alkalis.

Usage Guide

Hydroseal WP270 is added undiluted to the mixer, generally at dosages ranging between 0.1% and 0.3% by weight, based on total solids content. To ensure optimal product performance, proper mixing into the cement-based slurry is required.

Packaging

180 kg drums or 900 kg IBC
